

CARLYLE LOCATION

Box 1149, Carlyle, SK S0C 0R0
Phone: (306) 453-6190 Fax: (306) 453-6025

The Carlyle location performs work on installation of flowline gathering systems, skid and large steel fabrication, shop and field welding, and large facility work. Other areas of expertise include field and shop facility fabrication, daily crew maintenance, picker work, sand and gravel hauling, hydrovac, and heavy hauling.

Specialized equipment is available to ensure top quality work. The location has two picker trucks, a hydrovac truck, and a breathing air filling station, as well as access to any other equipment which may be required.

FULL SERVICE FACILITIES

The Carlyle location of Carson Energy Services employs between 25 and 35 workers, based out of the location's two shops.

The first shop is an 8,400 sq. ft. building which houses a welding facility, truck storage area and wash bay.

The second building, measuring 4,800 sq. ft. is home to a mechanical bay, painting and testing facility, office space, quality control room and training area.

SAFETY & QUALITY

As an industry leader, CES recognizes the need for safety is a priority. All CES employees are fully trained in safety procedures, and along with our comprehensive quality assurance program, it sets us apart from other companies.
