

ENVIRONMENTAL DIVISION

Box 160, Lampman, SK S0C 1N0
 Phone: (306) 487-2281 Fax: (306) 487-3235

Carson Energy Services Environmental Division, while headquartered at the main CES office in Lampman, has the ability to serve clients throughout Saskatchewan, as well as Manitoba and Alberta if required.

The broad range of environmental services offered by this division includes well abandonment and lease reclamation, site remediation, reclamation and re-vegetation, hydrocarbon and salt water spill cleanup, drainage tile installation, and flare pit removal.

Phase I and II Environmental Site Assessments are also done by this department, as well as soil conductivity contour mapping, electromagnetic surveys (EM31, EM38, and EM31-SH), soil and water sampling, gas migration testing and spill cleanup.

SPECIALIZED EQUIPMENT

The Environmental Division has at its disposal a full array of general and specialized equipment, such as trackhoes and backhoes, water trucks, dozers, tandem axle units,

tandem axle center and end dump trailers, pup trailers, cultivators, discers, paratills, mulchers, and crimpers.

As well, the equipment inventory contains a manure spreader, fertilizer spreader, rock picker, ATV with mounted grass seeder, and drill seeder, solar panels with submersible pumps, and a laser level and transit.

Trackhoe flare pit excavation

ENVIRONMENTAL PRODUCTS

As a one-stop supplier of environmental services and products, CES can supply its clients with items such as Magnacal-C, Magnacal-K, Calcium Nitrate, Magnesium Sulfate, oil absorbent, straw booms, straw, gravel and sand, charcoal, and grass seed.

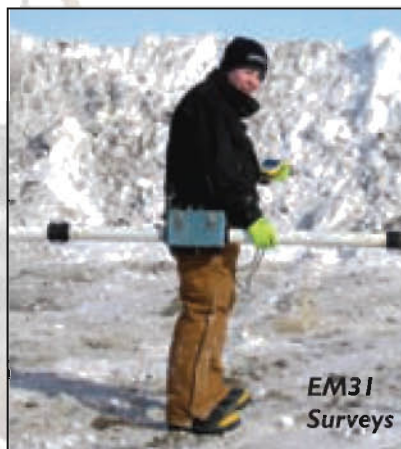

Gypsum, fertilizer, storage tanks, Sphag-sorb and Alfalfa Green round out the inventory of environmental products the department handles.

Hauling hydrocarbon impacted soil to waste disposal facility

QUALIFIED STAFF

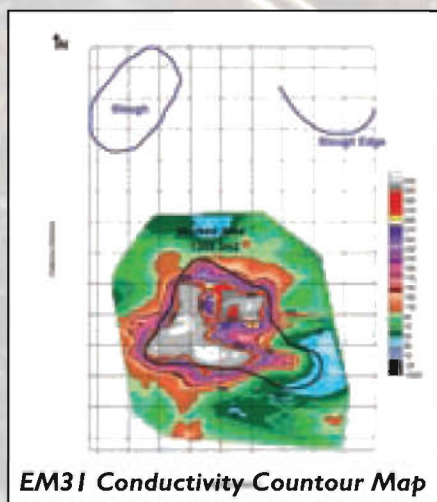

Along with the Department Coordinator, this division employs a qualified environmental technologist (A. Sc.T), one administrative support person and six staff members trained in machine operation and environmental process.
