

CARSON SAFETY SERVICES

Lampman, Swift Current, White City,
Regina/Emerald Park, Lloydminster,
Wainwright

As an industry leader, Carson Energy Services has committed itself to safety excellence, with the creation of Carson Safety Services. With a highly qualified team of safety experts, a rigorous safety training and tracking process, and the constant desire to improve on success, CES has been an example for others in the energy services sector to follow.

For instance, CES recently made the memorable and unprecedented 4 million man-hours LTA free. The Company has also received recognition in Alberta (Enform – Partnerships in Injury Reduction), Saskatchewan (Heavy Construction Safety Association of Saskatchewan) and Manitoba (Manitoba Heavy Construction Safety Program). In an industry in which safety is of the utmost importance for contractors, clients and employees, CES has provided a sharp focus and clear vision on the wellbeing of every person on its jobsites.

Mobile First Aid
treatment center

Carson Safety Services understands the safety issues faced on a construction or maintenance site. The health and safety of our employees is of primary importance in the performance of our operation. Risk inherent in all operations must be managed to prevent occupational injuries, illness and accident.

Experienced observation, site management, specialized help, and specialized safety equipment is part of Carson Safety's support methodology. Support can include both personnel and equipment in the following areas:

- Hazard identification
- Ensuring safe work performance
- Comprehensive investigation of accidents
- Proper reporting and documentation
- Training of site personnel
- Safety audits based on mutually agreed criteria
- Gas testing and automatic warning devices
- A broad range of equipment including safety trailers, breathing air systems, signage, barricades, First Aid and rescue equipment.

TRAINING

Carson Energy Services supplies the instructors to teach the following courses:

- Confined Space & Rescue
- H₂S Alive
- Transportation of Dangerous Goods
- WHMIS
- First Aid/CPR/AED
- PST/IRP-16
- Ground Disturbance Level II
- Pipeline Construction
- Basic Fire Fighting
- ATV Training
- Fall Protection
- Rigging & Hoisting
- Powered Mobile Equipment (PME)

Courses can be held in one of our locations, or at a location of a client's choice.

Breathing apparatus (H₂S Alive course)

Specially designed courses are also available on request.

Upon hire, each CES employee is put through a Carson Orientation which, depending on previous experience and training, can take up to 10 hours.

Once training is complete, the qualification data is compiled into personal folders and entered into the CES Safety Database.

This database, specially designed for the Company, is used as a tool to notify managers/safety officials when an employee's safety certification is coming up for renewal, and to provide real-time statistics tracking.

COMPLIANCE

CES has engaged a team of individuals to ensure that compliance requirements are met within online contractor databases such as ISNetWorld and Canada HSE.

Many of our clientele use these databases to replace traditional "paper-and-ink" prequalification processes, as well as to review and evaluate the Company's safety program.

Both ISNetWorld and Canada HSE require contractors to answer detailed questionnaires supplying safety data, insurance certificates, COR certification, WCB clearance & Master Service Agreements.

The CES Safety Policies and Procedure have seen many changes to accommodate the specific wording requests of the various clients.

Each client can grade the Company based on an individual set of criteria from all of the information entered by the Company. Currently, there are over 20 CES clients using the ISNetWorld database, many of whom have indicated they actively use a contractor's grade as a tool when evaluating bids, and some have made compliance and grading a requirement for contractors to work for them on any of their leases.

SAFETY TEAM

Within the Company's six safety departments, available personnel include our Safety Coordinators, Safety Field Supervisors, Safety Consultants, Auditors, Certified Safety Instructors to train CES employees, Confined Space Entry Supervisors, Trainers, Security Personnel and an Accident Investigator.

The six safety departments, located throughout Saskatchewan and Alberta, each report to a central senior safety coordinator.

CAR

Recently, Carson Energy Services has implemented the CAR procedure to underline the importance of safety to its employees. CAR, which stands for Compliance, Accountability, Responsibility, is an annual safety summit meeting which emphasizes employees' responsibilities, orientation and expectations. Along with this refresher, CAR provides training, guest speakers and instructional videos.

To discuss how Carson Energy Services can play an integral role in your upcoming projects, please contact one of our safety team members:
