Halbrite skid bay: Halbrite specializes in stainless steel fabrication for CO₂ injection

Available equipment includes welders, hoists, cranes, bevellers, forklifts, trolleys, cutting torches and rollers, as well as the heavy hauling equipment to move the completed skid.

From the large skid packages fabricated at our Lloydminster facility, an example of which would be skids completed for SAGD projects in northern Saskatchewan and Alberta, to smaller skids, treater and separator packages for multi-well batteries across the prairie provinces, CES can cover all of a client's skid and facility fabrication needs.

Carson Energy Services has seven locations which offer clients skid and facility fabrication services: Lampman, Halbrite, Carlyle, Alida, Swift Current, Wainwright and Lloydminster.

All of the CES facilities are equipped for skid and facility fabrication.

Lloydminster's 25,000 sq. ft. fabrication facility complete with sandblast paint shop

Skids are fabricated under ASME code by CES welders with pressure tickets and weld procedures to weld under these codes, and all pressure components meet boiler and safety branch requirements, and require notification to the provincial Boiler and Safety Division.

Fabrication work is performed using CWB certified welders and CWB approved weld procedures.

Multi-well header fabricated in the Wainwright shop

EnCana CO2 regeneration plant at Goodwater, SK

Valued clients for whom the Company has done work in the area of skid and facility fabrication include:

- Advantage Oil & Gas
- Apache Canada
- Arc Resources
- ATCO Midstream
- BP Canada
- Conoco Phillips
- C.N.R.L.
- Crescent Point Energy
- Enbridge Pipelines
- EnCana
- Enerplus
- Husky Oil
- N.A.L. Resources
- PennWest
- PetroBakken Energy
- Taqa North
- Tundra
- Zargon
